Class Project 7 - MDM Migration
Assignment Details

Automata Technology Services LLC

Revision 1.0

Scenario

Your organization has decided to standardize on Mosyle MDM and you have been tasked with migrating all Macs in the organization this new MDM. Some existing devices are enrolled in management through Microsoft Intune while others are not enrolled in MDM at all. You do not have the resources to erase and re-stage all of these Macs so you will need to migrate them "in place" to Mosyle.

Required Assets

- None.

Required Organization Changes

- Device Record in Apple Business Manager for each Mac.
- Device Group in Mosyle MDM for company owned devices being managed

Device Configuration End-State

- Previous MDM Profiles & Certificates Removed.
- Mosyle MDM Profiles and Certificates Installed.
- Access to the Macs in the Mosyle management console with Supervised Access.
- All existing user accounts, applications, and documents still in place on device.
