Force Restart

Hold Power Button

Hold Home Button

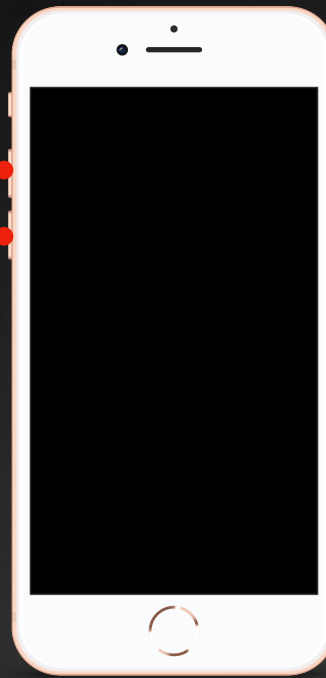

iPhone 7

Force Restart

1 - Volume Up (**Press and Release**)

2 - Volume Down (**Press and Release**)

3 - Power Button (**Hold**)

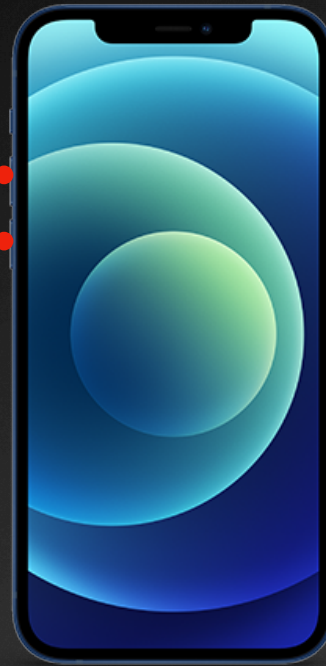

iPhone 8

Force Restart

1 - Volume Up (**Press and Release**)

2 - Volume Down (**Press and Release**)

3 - Power Button (**Hold**)

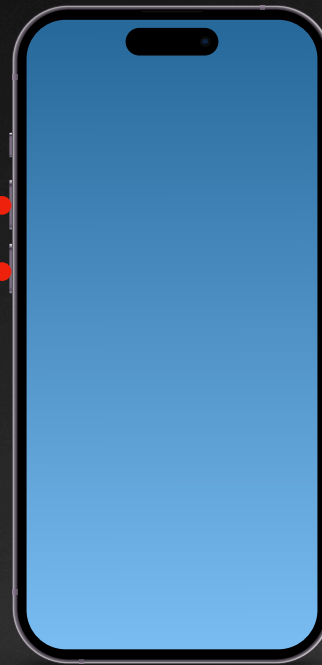

iPhone X+

Force Restart

1 - Volume Up (**Press and Release**)

2 - Volume Down (**Press and Release**)

3 - Power Button (**Hold**)

iPhone 14+

Force Restart

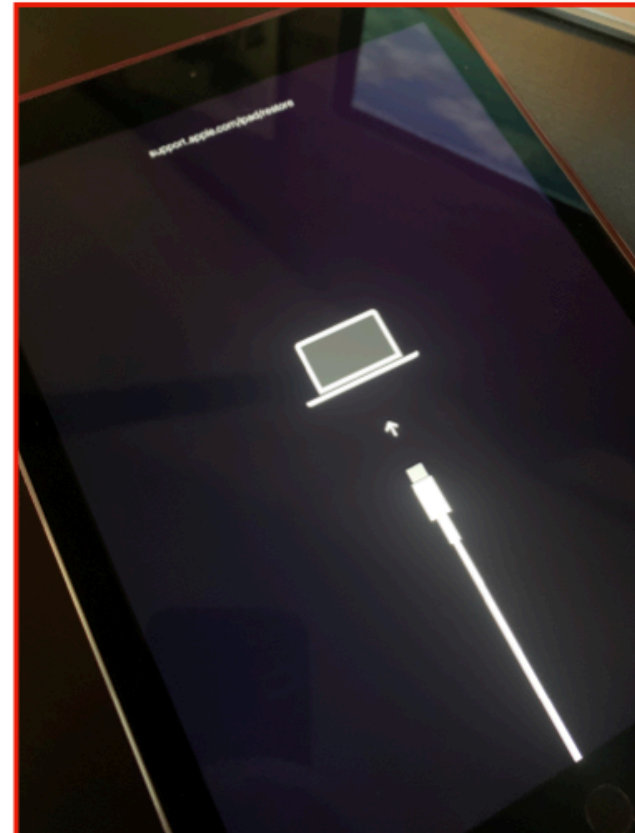

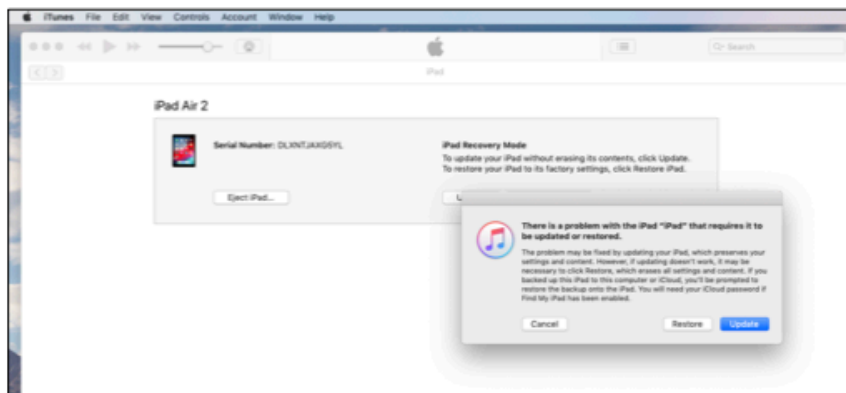

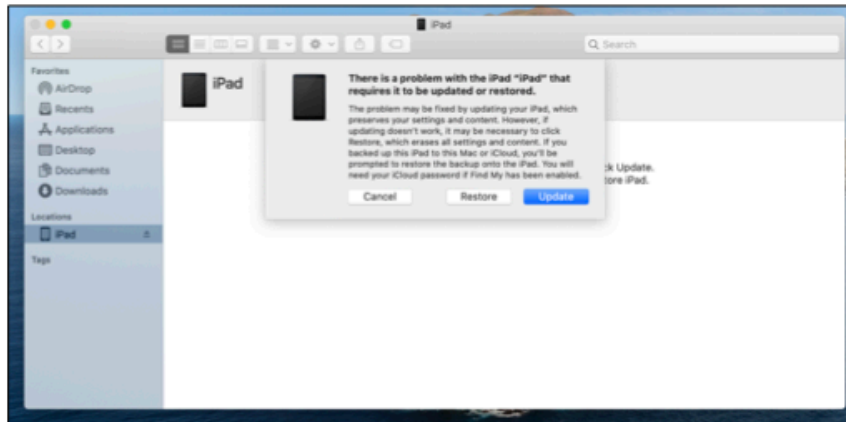

Legacy iPad

Force Restart

Modern iPad Models (Gen 9+, mini, and Pro)

Recovery Mode

Device Firmware Update Mode (DFU)

- Downgrade Firmware from a newer version (ie: iOS 18 to iOS 17)
- Attempt to repair a corrupted firmware install.
- Attempt to repair a corrupted iOS install.
- Reverse the effects of a jailbroken device.

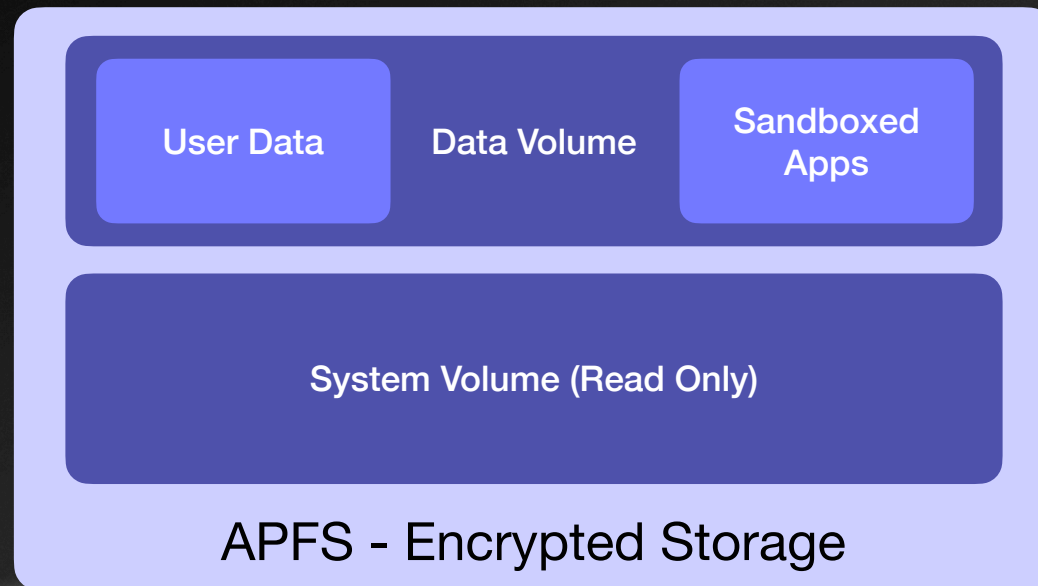

Battery Management

iOS Storage

Practical Exercise

File System

Sandbox App Concept

- **Runtime** - Executable Code (Logic)
- **Resources** - Images, Videos, XML, entitlements, icon(s), etc.
- **Home Directory** - location where each application stores it's own documents and preferences.
- *Apps can only access data from other Apps or the OS through specific services provided by iOS.*

iOS Backup Strategies

iOS Security & Privacy

Practical Exercise

iOS Screen Time

Practical Exercise

Screen Time

- Can be used with or without Family Sharing.
- Allows users to limit the amount of time they spend in specific apps or measure how much time they spend weekly on their devices.
- When used with Family Sharing, it allows parents to apply specific controls or restrictions on the device including.
 - **Downtime:** Hours the device is allowed to be used.
 - **Content Restrictions:** Limit adult websites or media based on ratings.
 - **Communication Restrictions:** Who the child can contact and how.
 - **Apps & In-App Purchases:** Restrict apps, types of apps, or require approval for IAP.

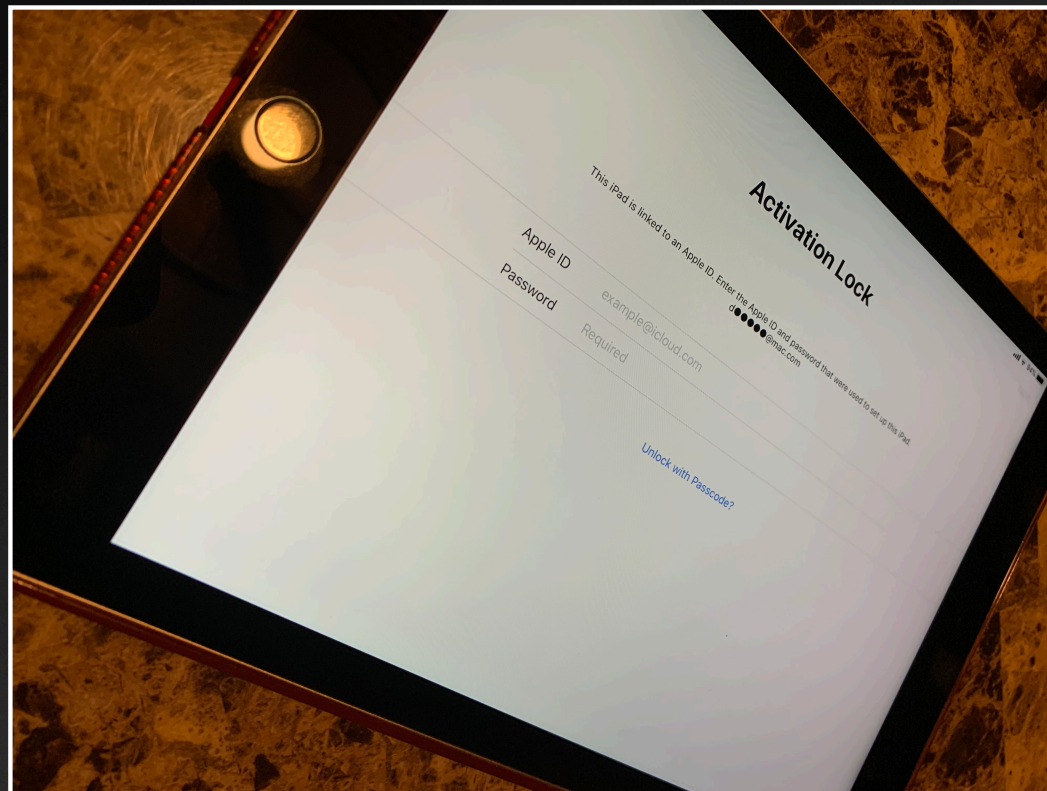

iOS Activation Lock

Practical Exercise

Activation Process

- After an iOS device is restored, reset (all content/settings), or when it is new out of the box.
- After the device connects to the Internet, the activation process begins.
- Communicates with Apple to determine ownership and if 'Find My' is enabled & associated with this device.
- If MDM is being used, this is also when the activation request is forwarded to your organization's MDM server for additional configuration, then Setup Assistant continues.
